

Opening Doors For REALTORS®

- No more reciprocal key programming needed,
- No need to travel to a neighboring association or MLS to have your key programmed.
- No additional cost to you!

All agents who are members of an Association in LA, Orange and Ventura Counties that are part of CARETS are now on a new "Cooperative Server" and that means **your key will open any box within the CARETS area.**

The Coop server is set up to operate on a real-time basis. Therefore, when a key is added or changed it is immediately sent to the Coop server.

There are no extra steps.

i-Tech MLS and CARETS have been working to accomplish this enhanced key service for more than a year and the task is now complete.

This is one more step in the i-Tech / CARETS goals of giving our members the access they need to list and show properties within the CARETS areas, without having extra expense or extra work for either members or association staffs.

To view the areas that your key is set up to work in simply log into SupraWEB and click on the link for "Update Code".
